

PROMPT — Recargar datos reales del hotel Maran Suites

Pegar completo en Replit

Necesito reemplazar los datos de ejemplo del sistema por los datos reales del hotel Maran Suites & Towers. Hay que borrar y recargar habitaciones, mesas de restaurante, salones de eventos y gabinetes de SPA. Los tipos de habitación, tarifas, menú y tratamientos se mantienen igual.

PASO 1 — Borrar datos existentes

En `server/seed.ts` o como un script separado, ejecutar las siguientes deletes en este orden (respetar el orden para evitar errores de foreign key):

```
// Borrar en orden correcto (primero los que tienen referencias)
await db.delete(spaAppointments);           // turnos de SPA
await db.delete(spaCabins);                  // gabinetes de SPA
await db.delete(eventRooms);                 // salones de eventos
await db.delete(restaurantTables);           // mesas
await db.delete(restaurantAreas);            // sectores de restaurante
await db.delete(rooms);                      // habitaciones
```

PASO 2 — Recargar habitaciones reales

Las habitaciones de Maran Suites & Towers son 35 habitaciones distribuidas en 5 pisos (piso 2 al 6), 7 habitaciones por piso.

Usar los mismos IDs de tipos de habitación que ya existen:

- `rt1` = Ejecutiva
- `rt2` = Premium
- `rt3` = Suite Panorámica

- **rt4 = Suite Presidencial**

```
await db.insert(rooms).values([
  // PISO 2
  { id: "r201", roomNumber: "201", roomTypeId: "rt2", floor: 2, status: "available" },
  { id: "r202", roomNumber: "202", roomTypeId: "rt1", floor: 2, status: "available" },
  { id: "r204", roomNumber: "204", roomTypeId: "rt2", floor: 2, status: "available" },
  { id: "r205", roomNumber: "205", roomTypeId: "rt3", floor: 2, status: "available" },
  { id: "r206", roomNumber: "206", roomTypeId: "rt3", floor: 2, status: "available" },
  { id: "r207", roomNumber: "207", roomTypeId: "rt2", floor: 2, status: "available" },
  { id: "r203", roomNumber: "203", roomTypeId: "rt1", floor: 2, status: "available" },

  // PISO 3
  { id: "r301", roomNumber: "301", roomTypeId: "rt2", floor: 3, status: "available" },
  { id: "r302", roomNumber: "302", roomTypeId: "rt1", floor: 3, status: "available" },
  { id: "r303", roomNumber: "303", roomTypeId: "rt1", floor: 3, status: "available" },
  { id: "r304", roomNumber: "304", roomTypeId: "rt1", floor: 3, status: "available" },
  { id: "r305", roomNumber: "305", roomTypeId: "rt3", floor: 3, status: "available" },
  { id: "r306", roomNumber: "306", roomTypeId: "rt3", floor: 3, status: "available" },
  { id: "r307", roomNumber: "307", roomTypeId: "rt2", floor: 3, status: "available" },

  // PISO 4
  { id: "r401", roomNumber: "401", roomTypeId: "rt2", floor: 4, status: "available" },
  { id: "r402", roomNumber: "402", roomTypeId: "rt1", floor: 4, status: "available" },
  { id: "r403", roomNumber: "403", roomTypeId: "rt1", floor: 4, status: "available" },
  { id: "r404", roomNumber: "404", roomTypeId: "rt1", floor: 4, status: "available" },
  { id: "r405", roomNumber: "405", roomTypeId: "rt3", floor: 4, status: "available" },
  { id: "r406", roomNumber: "406", roomTypeId: "rt3", floor: 4, status: "available" },
  { id: "r407", roomNumber: "407", roomTypeId: "rt2", floor: 4, status: "available" },

  // PISO 5
  { id: "r501", roomNumber: "501", roomTypeId: "rt2", floor: 5, status: "available" },
  { id: "r502", roomNumber: "502", roomTypeId: "rt1", floor: 5, status: "available" },
  { id: "r503", roomNumber: "503", roomTypeId: "rt1", floor: 5, status: "available" },
  { id: "r504", roomNumber: "504", roomTypeId: "rt1", floor: 5, status: "available" },
  { id: "r505", roomNumber: "505", roomTypeId: "rt3", floor: 5, status: "available" },
  { id: "r506", roomNumber: "506", roomTypeId: "rt3", floor: 5, status: "available" },
  { id: "r507", roomNumber: "507", roomTypeId: "rt2", floor: 5, status: "available" },

  // PISO 6
  { id: "r601", roomNumber: "601", roomTypeId: "rt2", floor: 6, status: "available" },
  { id: "r602", roomNumber: "602", roomTypeId: "rt1", floor: 6, status: "available" },
  { id: "r603", roomNumber: "603", roomTypeId: "rt1", floor: 6, status: "available" },
  { id: "r604", roomNumber: "604", roomTypeId: "rt1", floor: 6, status: "available" },
  { id: "r605", roomNumber: "605", roomTypeId: "rt3", floor: 6, status: "available" },
  { id: "r606", roomNumber: "606", roomTypeId: "rt3", floor: 6, status: "available" }
])
```

```
{ id: "r607", roomNumber: "607", roomTypeId: "rt2", floor: 6, status: "available"
});
```

PASO 3 — Recargar sectores y mesas del restaurante

```
await db.insert(restaurantAreas).values([
  { id: "area1", name: "Sector Bodega (Mesas 1-18)", areaType: "indoor", capacity: 18, hasTables: true },
  { id: "area2", name: "Sector Moneda (Mesas 19-32)", areaType: "indoor", capacity: 14, hasTables: true },
  { id: "area-rs", name: "Room Service", areaType: "private", capacity: 0, hasTables: false },
  { id: "area-delivery", name: "Delivery", areaType: "private", capacity: 0, hasTables: false },
  { id: "area-solarium", name: "Solarium", areaType: "outdoor", capacity: 0, hasTables: false },
  { id: "area-spa", name: "SPA", areaType: "private", capacity: 0, hasTables: false }
]);
```

```
await db.insert(restaurantTables).values([
  // Sector Bodega — 18 mesas cuadradas
  { id: "t1", tableNumber: "1", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t2", tableNumber: "2", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t3", tableNumber: "3", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t4", tableNumber: "4", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t5", tableNumber: "5", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t6", tableNumber: "6", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t7", tableNumber: "7", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t8", tableNumber: "8", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t9", tableNumber: "9", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t10", tableNumber: "10", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t11", tableNumber: "11", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t12", tableNumber: "12", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t13", tableNumber: "13", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t14", tableNumber: "14", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t15", tableNumber: "15", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t16", tableNumber: "16", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t17", tableNumber: "17", areaId: "area1", capacity: 4, shape: "square", status: "available" },
  { id: "t18", tableNumber: "18", areaId: "area1", capacity: 4, shape: "square", status: "available" },

  // Sector Moneda — 14 mesas redondas
  { id: "t19", tableNumber: "19", areaId: "area2", capacity: 4, shape: "round", status: "available" },
  { id: "t20", tableNumber: "20", areaId: "area2", capacity: 4, shape: "round", status: "available" },
  { id: "t21", tableNumber: "21", areaId: "area2", capacity: 4, shape: "round", status: "available" },
  { id: "t22", tableNumber: "22", areaId: "area2", capacity: 4, shape: "round", status: "available" },
  { id: "t23", tableNumber: "23", areaId: "area2", capacity: 4, shape: "round", status: "available" },
  { id: "t24", tableNumber: "24", areaId: "area2", capacity: 4, shape: "round", status: "available" },
  { id: "t25", tableNumber: "25", areaId: "area2", capacity: 4, shape: "round", status: "available" },
  { id: "t26", tableNumber: "26", areaId: "area2", capacity: 4, shape: "round", status: "available" }
]);
```

```
{ id: "t27", tableNumber: "27", areaId: "area2", capacity: 4, shape: "round", s
{ id: "t28", tableNumber: "28", areaId: "area2", capacity: 4, shape: "round", s
{ id: "t29", tableNumber: "29", areaId: "area2", capacity: 4, shape: "round", s
{ id: "t30", tableNumber: "30", areaId: "area2", capacity: 4, shape: "round", s
{ id: "t31", tableNumber: "31", areaId: "area2", capacity: 4, shape: "round", s
{ id: "t32", tableNumber: "32", areaId: "area2", capacity: 4, shape: "round", s
]);
```

PASO 4 — Recargar salones de eventos reales

```
await db.insert(eventRooms).values([
  { id: "er1", name: "Salón Mitre",    capacity: 100, status: "available", descri
  { id: "er2", name: "Salón Rivadavia", capacity: 60,  status: "available", descr
  { id: "er3", name: "Salón Mirador",  capacity: 40,  status: "available", descr
  { id: "er4", name: "Salón Rosedal",  capacity: 30,  status: "available", descr
]);
```

PASO 5 — Recargar gabinetes de SPA reales

```
await db.insert(spaCabins).values([
  { id: "cab1", name: "Agua",          description: "Gabinete Agua",          isActive:
  { id: "cab2", name: "Fuego",         description: "Gabinete Fuego",         isActive:
  { id: "cab3", name: "Aire",          description: "Gabinete Aire",          isActive:
  { id: "cab4", name: "Tierra",        description: "Gabinete Tierra",        isActive:
  { id: "cab5", name: "Hidromasaje",    description: "Gabinete Hidromasaje",    isActive:
  { id: "cab6", name: "Sauna H",       description: "Sauna Hombres",         isActive:
  { id: "cab7", name: "Sauna M",       description: "Sauna Mujeres",         isActive:
]);
```

PASO 6 — Verificación

Después de ejecutar el script, verificar que:

- `GET /api/rooms` devuelve 35 habitaciones (pisos 2 al 6, 7 por piso)
- `GET /api/restaurant/areas` devuelve los 6 sectores
- `GET /api/restaurant/tables` devuelve 32 mesas

- `GET /api/event-rooms` devuelve los 4 salones: Mitre, Rivadavia, Mirador, Rosedal
 - `GET /api/spa/cabins` devuelve los 7 gabinetes: Agua, Fuego, Aire, Tierra, Hidromasaje, Sauna H, Sauna M
-

Notas importantes

- Ejecutar los deletes en el orden indicado para evitar errores de foreign key
- No tocar las tablas de tipos de habitación, planes tarifarios, menú, tratamientos de SPA, huéspedes, empresas ni ninguna otra tabla
- Todas las habitaciones se cargan con estado `available`
- Si hay reservas activas vinculadas a las habitaciones eliminadas, el delete va a fallar — en ese caso primero borrar las reservas de prueba desde la interfaz del sistema antes de correr este script
- Verificar que compila y corre sin errores antes de dar la tarea por terminada
